“TOWN PLANNING ACT.”

July 24th, 1948.

PURSUANT to the provisions of Part III of the “Town Planning Act,” being chapter 287 of the “Revised Statutes of British Columbia, 1936,” as amended, His Honour the Lieutenant-Governor in Council has been pleased to approve the following regulations:—

REGULATIONS MADE PURSUANT TO PART III OF THE “TOWN PLAN- NING ACT” AS AMENDED.

1. These regulations shall apply to the area defined as follows:—Commencing at the north-west corner of the Municipality of the Township of Esquimalt, as defined by notice in The British Columbia Gazette under date of August 15th, 1912; thence north-easterly along the northerly boundary of said municipality and the prolongation thereof to the westerly boundary of the District Municipality of Saanich, as defined in The British Columbia Gazette under date of February 22nd, 1906; thence northerly along said westerly boundary to the north-east corner of Esquimalt Land District; thence westerly along the northerly boundary of Esquimalt Land District to the easterly boundary of Thetis Lake Park, as defined by notice in The British Columbia Gazette under date of April 27th, 1939; thence southerly along said easterly boundary to the north-west corner of Lot 13, Esquimalt Land District; thence south-easterly along the westerly boundary of Lot 13 to the south-east corner thereof; thence south-easterly along the shore-line of Esquimalt Harbour to the point of commencement.

2. The area defined in Regulation 1 is hereinafter called “the area” and shall be known as the “View Royal Regulated Area.”

3. The Lieutenant-Governor in Council may appoint an Inspector for the area.

4. The Inspector shall exercise the powers and functions conferred on him by these regulations.

SUBDIVISIONS.

5. The approving officer, as defined in the “Land Registry Act,” shall not approve of a plan of subdivision unless, in addition to compliance with section 85 of the “Land Registry Act,” there is compliance with the requirements prescribed in Regulations 6 and 7 hereof, except where provision for the relaxation of said regulations is made herein; provided that the approving officer, in cases where he considers strict compliance with the requirements of Regulation 6 would cause undue hardship, may, with the consent of the Inspector, approve a plan of subdivision without compliance with the requirements prescribed in Regulation 6.

6. No land shall be subdivided into lots or parcels for building purposes unless:—

- (a) A method of sewage-disposal satisfactory to the Medical Health Officer is possible for each lot;
- (b) Each lot in a residential district is at least seven thousand five hundred square feet in area and, in addition, is at least sixty feet in width and at least one hundred feet in depth, or in a commercial or industrial district is at least thirty feet in width and at least one hundred feet in depth. Where the area which it is proposed to subdivide is of such a shape, or the design of an adjoining subdivision is such, that in his opinion a variation from such measurements is justified, the approving officer may approve a plan showing such variation:

- (c) Each lot or parcel resulting from the subdivision abuts on a public highway along one full side of said lot;
- (d) The approving officer is satisfied that the subdivision design is suited to the configuration of the land in and about the area which it is proposed to subdivide, and to the road plan of adjoining subdivisions;

2. *Location*.—Any septic or other sewage-disposal tank shall be located outside and be separated from any wall of a dwelling-house. Any disposal field or area shall be located as far as practicable from any dwelling, and in no case shall disposal tiles be nearer at any point than ten feet to any dwelling.

No sewage-disposal system shall be so located that it is liable to contaminate any existing domestic water-supply, nor shall it be located under any roadway or traffic-way.

3. *Materials*.—The walls and floors of any septic tank or other sewage-disposal tank shall be of substantial water-tight construction.

4. *Capacity*.—No septic tank or other sewage-disposal tank shall have a capacity, below the invert of the outlet pipe, of less than four hundred gallons, and shall be constructed according to plans and specifications to be seen in or obtained from the office of the Inspector, or shall be constructed according to other specifications submitted to and approved by the Inspector.

Adequate provision shall be made for any condition that may result in a flow of sewage greater than four hundred gallons per day in any dwelling or fifteen gallons per person per day in any school or similar establishment. When computations or assumptions are made as to the expected flow of sewage, the septic tank shall be sufficiently large to allow a detention period of twenty-four hours and shall contain in addition a reasonable space for sludge storage.

5. *Design*.—The digestion or treatment and dosing chambers of any septic tank or other sewage-disposal tank shall be securely covered with concrete, metal, or wood, and shall be provided with adequate means of access.

The depth of the digestion chamber shall not be less than forty-two inches below the level of the liquid outflow. A space of at least twelve inches shall be provided above the level of liquid outflow for scum formation and gas escape.

The inlet and outlet pipes shall be of a size not less than that of the sewer served and shall be so provided with baffle plates or with inverted sanitary tee fittings as to prevent any excess turbulence or disturbance of the scum. The outlet baffle or tee fitting shall extend not less than six inches above and fifteen inches below the water-line. The inlet tee fitting or baffle shall extend several inches above and ten to fifteen inches below the water-level in the tank. The level of the outlet shall be two to four inches below that of the inlet.

6. *Dosing Chambers*.—Any septic tank or other sewage-disposal tank of more than 400-gallon capacity and discharging into a sub-surface tile disposal-field or sand filter shall be provided with a dosing chamber of liquid capacity at least one-tenth that of the treatment tank.

7. *Dosing Siphons*.—Dosing chambers shall be provided with siphons or other discharging devices and shall be

automatic unless other means are provided for their proper operation. Such siphons or other discharging devices shall be made of corrosion-resistant material.

8. *Storm Water*.—Surface or storm water shall not be drained into any private sanitary sewage-disposal system.

The length of open-joint tiling shall be not less than sixty lineal feet per dwelling in porous soils, and shall be increased in proportion to the number of bedrooms in excess of two and not more than five at the minimum rate of eighteen lineal feet per bedroom.

For schools and similar establishments whose daily requirements are of limited duration, the length of open-joint tiling shall be not less than two hundred and sixty lineal feet.

The volume of the disposal tile and feeder pipes shall in no case be less than one hundred and twenty per cent. of the discharge volume of the dosing chamber.

10. *Tile Disposal-field in Impervious Soil*.—No sub-surface sewage irrigation field shall be constructed in clay or other heavy or impervious soil unless porous filtration media and adequate drainage are provided by removing such impervious soil and replacing it with porous filtering material such as coarse sand, gravel, cinders, or broken stone to a depth below the bottom of the disposal tile of not less than eighteen inches and preferably not less than twenty-four inches.

11. *Size of Open-joint Tile and Method of Laying*.—Ordinary field drainage tile of a size not less than four inches shall be used. Open joints of one-eighth to three-eighths inch shall be left between tiles, and the upper half of such joints shall be covered by tarred paper, broken tile, or other approved protection. The tile trench shall be back-filled with coarse sand, gravel, cinders, or broken stone of particle size not greater than one-half inch in any dimension to a depth of six inches over the top and around the sides of the tile wherever the soil is less porous than coarse sand or gravel. Tiling shall not be laid under any roadway or traffic way.

12. *Grade of Tiling*.—The open-joint tiling shall be laid at a small uniform down grade not exceeding two inches per one hundred feet.

13. *Lateral Branches of Tiling*.—Lateral branches of open-joint tiling shall be not less than three feet apart and shall be connected to the liquid effluent pipe or to a header by sewer-pipe branch fittings. Header pipes shall be of a quality equal to that required for house sewer-pipes.
